EXPERIENCE

OneStream Software, Remote – *Director, DevRel & DevEx*

AUG 2024 - Current

Lead the developer relations efforts by driving growth and engagement, and facilitating feedback loops that help to foster a global developer ecosystem for developers building with OneStream. Building the internal- and external-facing developer experience from the ground up by creating documentation, tutorials, education programs, and advisory boards. Represent OneStream Software through speaking engagements, webinars, and other events.

Developer Experience Consultant

MAR 2017 - AUG 2024

Help and advise companies in creating, managing, and growing their Developer Experience initiatives, including their developer community and engagement initiatives and building up their internal- and external-facing experience for developers and practitioners. Advise on developing content around use cases and developer-centric endeavors via documentation, tutorials, blog posts, and videos. Speak at industry and developer events about Developer Experience, Developer Relations, Community, Developer Productivity, and more.

CircleCI, Remote — *Director, Developer Relations & Community*

FEB 2020 - AUG 2023   https://circleci.com

Led both execution and strategy in building a program to engage, educate, and excite the user base and build relationships with developers across the verticals. Managed a global team of Developer Advocates and Community Managers focusing on creating scalable, impactful, and trackable programs for both internal and external audiences. Collaborated closely with Product, Customer Engineering, Business Development, Engineering, Marketing, and Events to ensure coordinated participation and a consistent developer narrative. Worked with Marketing and Sales to effectively launch new services, features, and enhancements through the community, and support the Community through speaking engagements, webinars, and other events. Responsible for over $3 million in attributable pipeline through DevRel and Community programs.

Solace, Remote — *Director, Community & Developer Relations*

FEB 2019 - FEB 2020   https://solace.com

Led, coordinated, and managed the global Developer Community, the team, and Developer Relations initiatives. Helped shape the product roadmap, refine the developer experience, and build growth and engagement. Responsible for implementing the developer content strategy to provide developers using the PubSub+ platform with the resources necessary to be successful, from samples to tutorials to workshops and more. Attended and spoke at conferences and events and participated in online and offline communities to grow the awareness and implementation of Solace PubSub+.

PASSIONS

Family, coffee, community, open source, tech

Auth0, Bellevue, WA & Remote — *Head of Community*

DEC 2017 - FEB 2019   https://auth0.com

Led a team tasked with building, growing, and maintaining a Community for Developers interested in Auth0 products. Developed and implemented the online and offline engagement strategy, refining the Developer Experience and building relationships with developers. Attended and spoke at events around Modern Identity, Community, and Developer Relations. Built out an Open Source Maintainer strategy and implemented an MVP/Experts program.

XDA-Developers, Media, PA — *Dev & Community Relations*

FEBRUARY 2010 - DEC 2017   https://xda-developers.com

The public face of the largest mobile online community in the world, with over 8 million members. Implemented a Recognized Developer program to encourage and reward developers in the community. Managed and oversaw the News Portal. Built relationships between OEMs and independent developers and between developers and their users. Speak at conferences and meet with teams on how to work with the community to implement their product, whether software, hardware, or services. Drive future development initiatives and community direction. A vocal proponent of Open Source.

Fastboot Mobile, LLC., Kansas City — *Co-Founder & CTO*

MARCH 2014 - DEC 2017   https://fastbootmobile.com

Manage overall technical operations and direction, including project management and R&D, focusing on Android platform and application development, Web and IoT solutions, and security process analysis. Manage multi-functional, multi-national, distributed teams in 4 countries and across 6 time zones. Business and strategy with partner. Client management, technical consulting, and support on solutions delivered to OEMs, carriers, and mobile brands in China, India, and the United States. Quality control on solution delivery.
